POTENTIAL_NON_COMPLIANCE: Standard Pack Size

Reason: Declared quantity does not match a listed standard pack size.

Detected Quantity: 20 g

AI Inspection Summary

An inspection was conducted on a packaged food commodity under the 'biscuits' subcategory. Out of 9 evaluated rules, 8 passed, while 1 rule was flagged for potential non-compliance regarding standard pack size compliance based on the Rule Engine results.

Key Findings

PASS: Product / Commodity Name

The product or commodity name was identified as 'Biscuits' across multiple bounding boxes with high image quality and confidence.

PASS: Net Quantity

A valid Net Quantity declaration was found on the package label.

PASS: Maximum Retail Price

The Maximum Retail Price (MRP) label declaration was detected.

PASS: Unit Sale Price

Unit Sale Price information ('per 100 g') was successfully identified.

PASS: Manufacturer / Packer / Importer

Manufacturer information was present, identifying 'MRS. BECTORS FOOD SPECIALITIES LTD.'.

PASS: Consumer Complaint Contact

Consumer care contact details, including a toll-free number, were present.

PASS: Manufacturing / Packing Date

Manufacturing date details and factory codes were detected.

PASS: Best Before / Use By

Expiry/Best Before declaration was found on the package.

POTENTIAL_NON_COMPLIANCE: Standard Pack Size

The detected package quantity of 20g (parsed from 'Serving Size: 20 g (about 4 biscuits)') does not match the standard listed pack sizes specified in the rules (such as 25g, 50g, 60g, 75g, 100g, etc.).

Officer Attention

- Verify whether the detected 20g text corresponds to the actual Net Quantity of the packaging or if it represents a serving size declaration while the actual net weight is declared elsewhere.

Limitations

- Legal decision authority remains exclusively with the authorized Legal Metrology officer.
- The analysis relies strictly on automated text detection and pre-configured Rule Engine logic without independent legal interpretation.
